INVENTOR : NAKAMURA TAKAHARU;

INT.CL. : H04Q 7/38 G06F 3/14 G06F 15/02

TITLE : PORTABLE INFORMATION TERMINAL DEVICE

ABSTRACT : PROBLEM TO BE SOLVED: To simultaneously achieve convenience, small size and use for a long time by providing two display parts suitable for displaying a character, graphics, etc., and displaying a moving picture, a still picture, etc., of natural images.

SOLUTION: Communication data from a radio communication circuit part 11 is processed by being multiplexed and separated into character, graphics data, image data and audio data by a multiplex and separating part 12, the character, graphics data is displayed on a monochromatic LCD 14 by a display control part 13, the image data is decoded by an image CODEC part 15 and displayed on a color LCD 16. A control part 20 is connected with the multiplex and separating part 12, the character, graphics display control part 13, the image CODEC part 15, an audio CODEC part 17 and an operation part 21 operated by a user and controls the whole terminal.
